1. Organisation Overview

Olwethu's Bakery is a small local bakery that specialises in producing freshly baked goods such as bread, cakes, muffins, cupcakes, and pastries. The bakery focuses on providing high-quality baked products made from fresh ingredients and traditional baking techniques.

The business aims to deliver delicious and affordable baked goods to the local community while maintaining high standards of quality and customer service. Olwethu's Bakery also creates custom cakes for birthdays, weddings, and special events.

Developing a professional website will help the bakery promote its products, reach more customers, and allow customers to place orders or make enquiries online.

Vision

- To become the community's favourite bakery.
- To provide fresh, high-quality baked goods that customers love.
- To build a strong and trusted bakery brand in the local community.

Mission

- To bake delicious and affordable products using fresh ingredients.
- To maintain high standards of quality in all baked goods.
- To provide excellent customer service to every customer.
- To create beautiful custom cakes for birthdays, weddings, and special events.

Target Audience

- Residents who want fresh bread, cakes, and pastries.
- Families celebrating birthdays, weddings, and special events.
- Students and workers looking for affordable snacks and baked goods.
- Event planners or individuals who need custom-made cakes.
- Businesses or organisations that require baked goods for meetings or events.

2. Website Goals and Business

objectives

The main goal of the Olwethu's Bakery website is to create an online presence for the bakery and attract more customers.

The objectives of the website include:

- To showcase the bakery's products and services.
- To provide information about the bakery and its story.
- To allow customers to place online orders or request custom cakes.
- To display images of baked goods and previous cake designs.
- To provide contact information for customer enquiries.
- To increase brand awareness and credibility for the business.

Key Goals

- Increase online visibility to make my Bakery easier to find online for both new and existing customers.
- Boost sale customers to drive more orders through the website, including custom cake requests.
- Enhance Customer Engagement to encourage interaction through contact forms, social media links, and product showcases.
- Build brand credibility so we can display professional visuals, customer testimonials, and the bakery's story.

Key Performance Indicators (KPIs) to Measure Success

- **Number of Website Visitors:** Track how many people visit the website each day or month.
- **Online Orders Received:** Measure how many customers place orders through the website.
- **Customer Enquiries:** Count the number of enquiries received through the contact form, email, or phone.
- **Customer Reviews and Feedback:** Monitor positive reviews and customer satisfaction.
- **Social Media Engagement:** Measure likes, shares, and comments if the website links to social media pages.

- **Repeat Customers:** Track how many customers return to buy again.
- **Sales Growth:** Monitor whether the bakery's sales increase after launching the website.

3. Current Website Analysis

Currently, Olwethu's Bakery does not have an official website. The business mainly relies on word-of-mouth marketing, social media platforms, and local customers who visit the bakery.

Without a website:

- Customers cannot easily view the bakery's products online.
- The bakery has limited online visibility.
- Potential customers may find it difficult to place custom cake orders.
- The business may lose opportunities to competitors who have websites.

Strengths of the Business

- High-quality baked goods made with fresh ingredients.
- Strong relationships with local customers through word-of-mouth.
- Ability to create custom cakes for birthdays, weddings, and special events.
- Active presence on social media to showcase products.
- Good reputation in the local community.

Weaknesses of the Business

- Limited online visibility and marketing reach.
- Customers cannot place orders online easily.
- Potential customers outside the local area may not know about the bakery.

Areas of Improvement

- Allow customers to place orders for baked goods and request custom cakes directly through the website.
- Use search engine optimisation (SEO) and online marketing to help more people find the bakery online.

- **Provide Easy Contact Options:** Include contact forms, phone numbers, email addresses, and location details for customer enquiries.
- **Reach a Wider Audience:** Use the website to attract customers beyond the immediate local area.

4. Proposed Website Features and Functionality

The proposed website for Olwethu's Bakery will include the following pages and features:

Homepage

The homepage will introduce visitors to the bakery and highlight popular products. It will include:

- A welcome message
- Featured baked goods
- Special promotions
- Quick contact information

About Us Page

This page will provide background information about the bakery, including:

- The story behind Olwethu's Bakery
- The bakery's mission and values
- Information about the owner and baking experience

Products Page

This section will display the different baked goods offered by the bakery, such as:

- Bread
- Cakes
- Cupcakes
- Pastries
- Custom cakes

Each product will include images and descriptions.

Gallery Page

Sensible Edibles, 2026. *Sensible Edibles*. [online] Available at:
<<https://sensibleedibles.com>> [Accessed 10 March 2026].

Online Order or Request Form

Customers will be able to:

- Request custom cake designs
- Place orders for baked goods
- Provide details for special events

Contact Page

The contact page will include:

Phone Number: 083 000 0000

Email Address: olwethusbakery@gmail.com

Business Location: 45 Market Street, Johannesburg, South Africa

A contact form will allow customers to send enquiries directly through the website.

Mobile-Friendly Design

The website will be responsive and accessible on smartphones, tablets, and desktop computers to ensure a good user experience.

Website Structure (Sitemap)

The structure of the Olwethu's Bakery website will be organised as follows:

Home

|

└─ About Us

|

└─ Products

|

└─ Bread

|

└─ Cakes

|

└─ Cupcakes

|

└─ Muffins

|

└─ Pastries

|

└─ Gallery

|

└─ Order / Request Cake

|

└─ Contact Us

This structure ensures easy navigation for website visitors.

5.Design and experience

Colour Scheme (Proposed Colour Palette)

The colour scheme will reflect the warm and welcoming nature of a bakery while keeping the website easy to read.

- **Brown (#6B3E26):** Main colour representing baked goods and warmth.
- **Cream (#FFF5E1):** Background colour to create a soft and inviting look.
- **Light Beige (#E8D5C4):** Used for section backgrounds and layout separation.
- **Soft Pink (#F48FB1):** Accent colour used for buttons like *Order Now* or *Contact Us*.

This colour palette creates a friendly and cozy bakery atmosphere

Typography (Font Choice and Hierarchy)

The website charcoal business used simple and readable fonts.

- **Aptos (11):** Used for headings and navigation.
- **Aptos:** Used for body text and descriptions.

Hierarchy

- H1 Headings – Large and bold for page titles
- H2 Headings – Section titles
- Body Text – Clear and readable for information

Layout and Design Approach

Key design principles include:

- **Simplicity:** Clean layout with clear product sections.
- **Consistency:** Same colours, fonts, and spacing across the website.
- **Visual hierarchy:** Important information and products placed at the top.

- **Responsive design:** The website will work on desktops, tablets, and mobile devices

Key features include:

- **Simple navigation menu:** Home, About Us, Menu, Gallery, Order/Quote, and Contact.
- **Clear call-to-action buttons:** Such as *Order Now*, *View Menu*, and *Contact Us*.
- **Fast loading pages:** Optimized images and simple design for quick access.

These features make it easy for customers to view bakery products, place orders, and contact the bakery.

Low-Fidelity Wireframes

Low-fidelity wireframes help show the structure and layout of the website before development begins.

6. Technical Requirements

The development of the Olwethu's Bakery website will require the following technologies:

Domain Name:

olwethusbakery.co.za

Web Hosting:

A reliable hosting service to store the website online.

Programming Languages:

- HTML – for structuring website pages
- CSS – for designing and styling the website
- JavaScript – for interactive features such as order forms

Content Management System (Optional):

WordPress may be used to make it easier to update products and content.

Browser Compatibility:

The website must function correctly on major browsers such as Google Chrome, Mozilla Firefox, Safari, and Microsoft Edge.

Security:

An SSL certificate will be used to ensure secure browsing and protect customer information.

7. Timeline and Milestones

Phase	Activity	Duration
Planning	Research and project planning	1 week
Design	Creating website layout and structure	1 week
Development	Building website pages	2 weeks
Testing	Testing functionality and fixing errors	1 week
Launch	Publishing the website online	1 week

Total Estimated Time: 6 Weeks

8. Budget

Item	Estimated Cost
Domain Registration	R150 per year
Web Hosting	R1200 per year
Website Design and Development	R4500
Images and Content Creation	R700
Maintenance	R2000 per year

Total Estimated Budget: R8,550
